

Computer Automation Systems, Inc. and LRP Publications agree to cooperative marketing partnership

Mountain Home , AR and Palm Gardens , FL - May 31, 2005 – Computer Automation Systems, Inc. and LRP Publications today announced a cooperative marketing partnership that will allow Computer Automation's customers direct access to the latest special education news and developments contained in LRP's Special Ed Connection™ from within SEAS™, the industry's leading special education management software system.

“This exciting partnership with LRP, the leader in special education legal resources for school districts, allows us to bring important, time-sensitive information directly to our customers,” said Harvey Hughes, President of Computer Automation. “SEAS customers will have context-sensitive access directly to LRP content in the Special Ed Connection system from within SEAS. This partnership will put the power of information in the hands of our customers, special educators, when they need it the most.”

LRP's Special Ed Connection (www.specialedconnection.com) is the one-stop reference center for school districts' special education needs. Only Special Ed Connection™ delivers the most timely and important news, case law, statutes, regulations, and more. Customers also get coverage from LRP's Washington, D.C., bureau on critical special education issues in Congress, OSERS/OSEP, OCR and other federal agencies - giving exclusive insight into, and solutions for, challenges special educators face every day.

“We couldn't be more pleased about partnering with Computer Automation,” said Ken Kahn, LRP President. “Their SEAS solution has become the market leader because they are a company that listens to their customers and delivers solutions that address their needs. Our companies have the same passion for serving our customers and this partnership is an exciting and timely offering for school districts trying to grasp the new IDEA 04 requirements.”

The SEAS solution (www.computerautomation.com) is the leading special education management software system. SEAS manages all documentation, timeline compliance, service tracking, and reporting needs for PreK-12 special education programs and is currently installed in over 1,400 school districts.
