

Computer Automation Systems announces launch of the SEAS Achievement Plans™ solution

Nation's leading special education plan management company launches platform that manages all educational plans

Mountain Home, AR – July 24, 2009 –Computer Automation Systems' (CAS), the nation's leading special education plan management software company announced today the launch of the SEAS Achievement Plans™ solution designed to manage all educational plans for school districts.

Bob Bundy, CAS Product Director discussed the launch of this new solution. “We're very excited that this day is finally here. We met with customers nationwide for more than two years to make sure SEAS AP would address their needs. The market was flooded with new RTI “experts” two years ago, but our customers were asking us for help in managing all of their educational plans. So we know the wait was worth it.”

SEAS Achievement Plans is a solution that will allow educational institutions to manage all types of educational plans including 504, RTI (academic intervention), behavior, gifted, and others. It is a 100% web-based product that users access from any secure Internet browser.

SEAS Achievement Plans is designed for ease-of-use and powerful data-tracking and reporting features such as:

- Caseload management and progress updating from a single screen
- Collaborative features such as messaging, event scheduling/tracking, and calendaring
- Role-based security model with security access to the field level if necessary
- Integrated Resource Center that allows districts to catalog and track all educational resources used in educational plans and report on their effectiveness
- Integration with SEAS Special Education to transfer any RTI plans for students referred to special education
- Longitudinal data analysis and reporting over time across many demographic dimensions
- Integration with student management systems with custom and industry-standard SIF® interfacing

“In planning and discussing this solution with customers over the last two years,” continued Bundy, “several school districts have bought the product in a pre-release capacity. They are very excited to see the implementations begin and we are very gratified that our vision matched their needs so well that they bought the package before it was ever announced.”

SEAS Achievement Plans will be available for purchase and for implementation in August 2009. The first plan included is academic intervention plans (RTI) with other plans soon to follow. Information about the product availability, pricing, training, and demonstrations can be found on the company's website at <http://www.computerautomation.com/seasap.asp> or by calling toll-free 877-221-7327.

About Computer Automation Systems Inc.

A K12 PLAN MANAGEMENT COMPANY

Computer Automation Systems (<http://www.computerautomation.com>) is passionate about helping K-12 educators meet the individual needs of students. Since 1996, its special education plan management line of products (SEAS™) has helped more than 2,000 school districts in 36 states and Puerto Rico reduce paperwork, improve compliance, increase efficiency and demonstrate accountability. That experience in Special Education and IEP Management allows us to now help districts with any student performance plans. It is this plan management expertise, coupled with exceptional customer service which permits Computer Automation Systems to retain over 99 percent of its customers while allowing schools to leverage data to improve student performance.
