

SEAS™ Achievement Plans

Academic Intervention and Response to Intervention Management

MANAGE ALL STUDENT PLANS

- Academic Intervention
- RTI
- 504 (*upcoming release*)
- GATE (*upcoming release*)
- ELL (*upcoming release*)
- LEP (*upcoming release*)
- Behavior management (*upcoming release*)

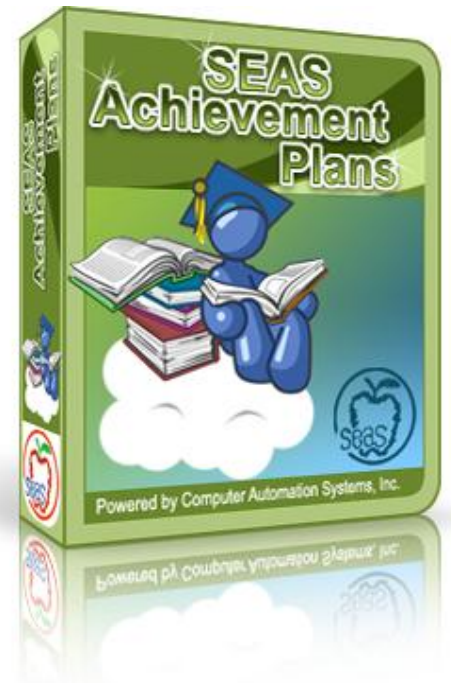

COLLABORATION FEATURES

- Integrated messaging
- Automatic alert notifications
- Integrated calendaring
- Multiple users can work on the same plan simultaneously
- Workflow features

EASE OF USE

SEAS™ Achievement Plans is designed to maximize your efficiency and minimize the time required to manage your student plans.

- On-line access to all student plans
- View and record student progress from a single screen
- Longitudinal data analysis at student, school, district levels
- Collaboration features allow all staff members to participate
- National leader in student plan management software

PLAN MANAGEMENT PLATFORM

Today, more than ever, educators need an easy-to-use yet powerful way to manage all of the individual plans for their students.

The SEAS™ Achievement Plan solution is a single, centralized repository where all educators – teachers as well as administrators – can build, manage, track progress, and analyze detailed student educational plans.

This solution allows for collaborative work among student study teams, child support teams, intervention teams, etc., allowing them to work separately on the same plans.

SEAS™ Achievement Plans is designed for ease-of-use with single-click operations wherever possible to maximize staff efficiency. Every student plan allows for progress monitoring and tracking, displaying student progress graphically.

SEAS™ Achievement Plans is being released with RTI and Academic Intervention Plans as the first plans with other student plans to follow quickly.

RTI and ACADEMIC INTERVENTION PLANS

Since the authorization of IDEA 04, Response to Intervention (RTI) as a formal part of the special education identification and eligibility process, has taken hold nationwide. At the same time, school districts are rapidly adopting Intervention-based Instruction within the general education arena.

Both of these initiatives require teachers to identify and quickly assign classroom interventions to help struggling students before they get too far behind. Teachers must also track student progress within each intervention, often on a daily basis.

SEAS™ Achievement Plans puts the classroom teacher in control of their own data. With the ability to record progress for all students' plans from a single screen, teachers are no longer chained to their desks with administrative paperwork. Teachers can also easily and quickly identify student progress during an intervention which leads to quick decisions based on student results.

Letting teachers teach...letting teachers be successful. Isn't that what it's all about?

Data-Driven Decisions made easy

TECHNICAL SUPPORT

Available to every user of the system, toll-free. No bottlenecks, no waiting, just answers when you need them.

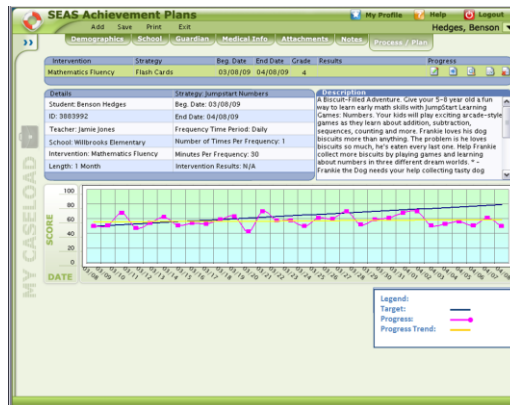

FULL HOSTING SERVICES

No one has more experience with hosting applications than Computer Automation. Our high-availability, high-redundancy, state-of-the-art data center provides secure, dependable access to your applications when you need it.

INTEGRATION

SEAS™ Achievement Plans integrates with your other applications:

- Student Information
 - Special Education
 - Benchmark testing data
- and eliminates the need for redundant data entry. This increases your compliance and makes your staff more efficient.

Too often, teachers and administrators must make decisions for the educational path of their students with incomplete information. Information that may be scattered throughout the district, among many staff members.

SEAS™ Achievement Plans puts all information about student plans into a single location. Data is organized for easy entry, easy retrieval, and, most of all, easy analysis. There is no guessing or estimating student progress. There is no question about the effectiveness of intervention strategies.

SEAS™ Achievement Plans allows teachers to graphically see

student achievement. With the integrated Resource Center, teachers can select and deploy the resources that are proving to be most effective for their students. From a single screen, administrators can view overall effectiveness of interventions and strategies longitudinally across a wide selection of criteria including student, grade, teacher, building, and district.

SEAS™ Achievement Plans put educators back in control of student achievement.

Trust the National Leader

For over seventeen years, school districts have trusted Computer Automation Systems, Inc. to be a true and dedicated partner in their success.

Today, over 2,000 school districts nationwide rely on Computer Automation Systems' applications to manage their student populations and data needs. With a dedicated team and a passion to serve, our company devotes itself, every day, to the on-going success of every one of our customers.

Over the years, our applications have grown and expanded to meet changing educational needs. SEAS™ Achievement Plans is the result of many years of research and design focused on a powerful, comprehensive solution to the business need of student plan management.

Please allow us the privilege of serving your needs.
