

San Antonio ISD awards special education management contract to Computer Automation Systems, Inc.

Mountain Home, AR and San Antonio, TX – May 4, 2004 – San Antonio Independent School District today announced the award of the contract to manage their special education program to Computer Automation Systems, Inc.

Computer Automation will deploy a combination of the leading SEAS Web Special education management system, customization of San Antonio special education forms, and district-wide training to meet the needs of San Antonio ISD.

“We realized that we needed a comprehensive system to manage our special education program, reduce paperwork, and help our teachers spend more time with children,” said Becky Overbite, Director of Special Education. “Computer Automation provided the best solution for us by combining a great software package, a solid services offering, and a proven track record of success for school districts in Texas and nationwide. We couldn't be more pleased with our choice.”

“Computer Automation Systems is very excited about our forthcoming relationship with San Antonio ISD. We are very proud of our success with SEAS, but most of all, proud that our company has made a positive impact on the lives of special education professionals, parents and special-needs children,” said Harvey Hughes, CEO of Computer Automation Systems.

Both parties anticipate that the implementation of the SEAS Web program, the customization of forms, and the training of the San Antonio ISD staff will occur so that the system will be implemented by the start of the new school year in August, 2004.

Deby Robins, Computer Automation's Director of Services said, “We realize that our job is to make San Antonio successful. We're going to approach this project with the same care and dedication to success that we do in a school district with less than fifty special education students.”
