

Scottsdale Unified School District awards special education management software contract to Computer Automation Systems, Inc.

Mountain Home , AR and Scottsdale , AZ - December 14, 2004 – Scottsdale Unified School District today announced the award of a contract to provide special education management system software to Computer Automation Systems, Inc. of Mountain Home , AR.

Computer Automation will deploy a combination of the leading SEAS™ Web special education management system, customization of Scottsdale special education forms, and district-wide training to meet the needs of Scottsdale .

“We realized that we needed a comprehensive system to manage our special education program, reduce paperwork, and help our teachers spend more time with students,” said Lois Healey, Director of Special Education. “Computer Automation provided the best solution for us by combining a system that focuses on ease of use for teachers, a proven track record of success for school districts of all size nationwide, and a software solution that will change and grow with us as we begin implementing the new changes due to IDEA reauthorization. We couldn't be more pleased with our choice.”

"Computer Automation Systems is very excited about our partnership relationship with Scottsdale . We are very proud of our success with SEAS, but most of all, proud that our company has made a positive impact on the lives of special education professionals, parents and special-needs children," said Harvey Hughes , CEO of Computer Automation Systems. “We know that our job is to partner with Scottsdale to make this software system successful and, in turn, help them make that positive impact for their students.”

About Scottsdale Unified School District

The Scottsdale Unified School District has 33 schools serving nearly 27,000 students and employing more than 3,000 persons, including about 1,700 teachers. The district has more schools with the state's highest rating, Excelling, than any other district in Arizona .
